

Provision and OpenEdge have partnered to provide you a secure solution to collect more funds.

As patient responsibility increases, point-of-care payment processing has never been more critical. OpenEdge and Provision have partnered to offer you a payments solution that excels at point-of-care payment processing and provides features such as recurring and card-on-file billing.

Features and Benefits

- **One-step processing.** Securely process credit, debit and check transactions.
- **Integrated posting.** Payments post directly into the patient's account in your Provision practice management software, eliminating manual posting.
- **Divide payments.** Split patient payments and apply as needed.
- **Payment plans.** Card on file technology cuts down on open patient balances and dramatically reduces the cost of patient account collections. OpenEdge securely stores the card data, enabling practices to prearrange payment plans.
- **Security.** The OpenEdge payment functionality within Provision delivers an integrated, certified secure payment processing solution with these features:
 - **Point-to-Point encryption.** OpenEdge's encryption technology renders cardholder data unreadable at the point of swipe or key.
 - **Token Vault for Card-on-File.** Stored cardholder data is replaced by digital "tokens" and kept in OpenEdge's off-site vault, rendering sensitive data useless to hackers.
